Reviews These reviews will give you a general idea of what is available. I have briefly judged the different IEM as to sound quality, fitting and useful life.

I tested most IEM on my Cowon iAudio X5 which was directly connected to the headphone-out, without using an amplifier. I switched off all equalizer settings and tested with the original iAudio software instead of using Rockbox. I will both review ‘cheaper’ models as well as top level ones.

I realize that these reviews are not full and that not everybody will eventually come to the same conclusions as I have reached. I am looking forward to your additions, remarks and requests or questions. {mosgoogle left}
